

HazMat Environmental Group, Inc. Receives RCMS Certification

We are pleased to announce that HazMat Environmental Group, Inc. has received Responsible Care Management System (RCMS) Certification through a 3rd party verification audit by Midland Engineering, Ltd. The audit was conducted December 17-19, 2007 and a certificate of compliance with RCMS requirements was issued on December 19, 2007. No major or minor findings were present to warrant corrective actions before certification.

We would like to thank our more than 25 current ACC Member Company customers for their advice, direction, encouragement and support of our efforts to comply with ACC's RCMS. We appreciate your business and we are fully committed to helping you continue to improve your EHS&S performance through our hazardous waste and hazardous material transportation services. We look forward to earning the privilege to service more of your business.

We also look forward to helping additional ACC Member Companies improve their EHS&S performance and realize the value of RCMS Certification and the ACC.

Please forward this announcement to Environmental, Transportation and Purchasing professionals within your company who are responsible for selecting your carriers for hazardous waste and hazardous material transportation.

HazMat Environmental Group, Inc. is a national carrier specializing in safe and efficient transportation of hazardous waste and hazardous material. HazMat services ACC Member Companies who are interested in managing risk exposure while their hazardous waste and hazardous materials travel on public highways. Our attention to detail provides confidence and peace of mind.
